

WE ARE AT THE DAWN OF A NEW ERA FOR HUMANITY AND THE NATIONAL SPACE SOCIETY IS CONTINUING ITS ROLE AS THE LEADING VOICE FOR SPACE SETTLEMENT

For decades, the National Space Society has been a strong advocate for creating vast settlements to allow human beings to expand beyond the Earth. What has been a bold vision of the future is now becoming reality. Humanity has begun the first concrete steps towards Space Settlement and the next decade will be one of the most pivotal eras in human history. Today we are beginning the journey to becoming a multi-planet species.

In recognition of these momentous developments, the National Space Society is convening the Space Settlement Summit to bring together the leading people, companies and organizations that are making Space Settlement a reality. Participation in this event will be by invitation only and is limited to a very select group of people who will set the cultural message of near term Space Settlement and those who will build and finance it.

The objective of the Summit is to show the synergistic in-space ecosystem that is emerging; to facilitate a convergence of interests and opportunities among the key players; and to identify critical issues along the path to Space Settlement.

This Space Settlement Summit is where key leaders who will be at the forefront of Space Settlement over the next decade will come together for a constructive dialogue on how we can work together to foster Space Settlement and identify key issues that will need to be dealt with and resolved.

Date: October 18–19, 2017

Venue: Le Meridien Delfina

530 Pico Blvd, Santa Monica, CA 90405
